‘SOURCE OF WATER’

Environment Competition Project 2015

by

Fuhua Primary School

Creating Opportunities. Leading Learning. Building Communities.
Why Waste Our Waste?

It’s simple but true:
That you can conserve energy;
By converting something old into something new.

A little knowledge will go a long way;
To help protect our environment every single day.

All you have to do is, not throw it away;
Just put it aside for the recycling day.
Why Waste Our Waste?

Separate it, bag it, place it near your trash; They’ll come and get it, for no extra cash.

Newspapers, magazines, bottles and jars; Plastics, junk mail – Hey! even your car.

Recycling is: collecting, processing and reusing your stuff; It’s a good habit, it’s never enough.

Tanysha Anand, Grade 6 Huber Street School Secaucus
Project Title: ‘Source Of Water’

Water Feature Using Recycled Materials
Objectives

Have a greater appreciation for

- the simplicity of life through frugality and practising waste minimisation
- our precious limited source of water.
Objectives

To spark creativity in the students to think of ways to adopt the 4Rs in their lifestyle.
Background of The Project

Green Champions and Befrienders’ Club

Our Own Prototype
The lessons were really fun. They were interesting. I could learn a lot of things about water. I did a lot of group works. We spent a lot of doing this.

I had fun with my friends. I knew more about my friends after this activity. Thanks!

Save Water! Water is precious!
I felt that using such small things, I can create items that can be better than the original! There were many ways to do the fountain and we had a hard time choosing the best one. It was fun and I did not know these kind of fountains existed before! I look forward to doing it!
Share Our Knowledge

Pre-Assembly Sharing
Extend Our Knowledge

Singapore SMART School of the Future

Creating Opportunities. Leading Learning. Building Communities.
Going Beyond School

Present our created projects as gifts to the old folks from Jamiiyah Home to beautify the place.

Sharing of knowledge on recycling as a means of reducing unwanted waste around us.
Desired Outcomes

Our school members have heightened awareness that everyone has a role to play in caring for the environment.

Creative in finding solutions to reduce pollution.
Desired Outcomes

Appreciate the limited and clean source of water.

Be frugal and not contribute unnecessarily to creation of more waste.
In Partnership With Senoko

Our partner, SENOKO, provides us with an invaluable opportunity for collaboration. Their support in our environmental efforts, be it in knowledge and expertise or making the necessary resources available, motivates us to explore other possible projects to embark on in the future.
THANK YOU!
